

## Data Clearing House and Online Intelligence for CDMA - ACCESS® / ACCESSibility®

ACCESS simplifies the exchange of billing data with your roaming partners by handling it for you.

ACCESSibility is a Web-enabled reporting system that allows you to view, print or download various clearing and settlement reports using data accumulated from ACCESS.

### **ACCESS Streamlines Operation of Roaming Business for AMPS, CDMA and TDMA**

Syniverse's **ACCESS** service simplifies the exchange of billing data with your roaming partners by handling it for you. Whether you are the visited or home carrier, you'll have a single point of contact for exchange of roamer billing records. This results in streamlined processing of roamer billing data, a single source of information regarding your roaming customers, as well as a way to calculate your financial position with your roaming partners.

### **More Effective Control Over Roaming Business**

ACCESS provides data to help you manage your financial position. This data allows you to:

- Anticipate revenues and expenses resulting from roamers in your markets and your subscribers roaming in markets belonging to your roaming partners
- Avoid potential losses when CIBER file data fails to meet industry standards or where duplicate call records are forwarded
- Perform revenue assurance by validating against roaming agreements
- Facilitate receivable invoicing for service provided to your subscribers, as well as the reconciliation of amounts due to other operators
- Assist your management in market analysis by providing roaming information about your subscribers
- Detect possible fraud by identifying a subscriber whose usage has surpassed a predetermined threshold

### **Benefits of ACCESS**

- Provides a single point of contact for exchange of roamer billing records
- Calculates financial net position with roaming partners
- Enables revenue assurance by ensuring valid messages
- Gives you increased financial and management control
- Provides a resubmit process that recovers revenue from recently rejected records that failed the Routing and CIBER formatting edits.
- Offers one consistent reporting tool to view inter and intra company data processing

### **ACCESSibility**

Syniverse's **ACCESSibility** service is a Web-enabled reporting system that allows you to view, print or download various clearing and settlement reports using data accumulated from Syniverse's ACCESS service. ACCESSibility is available through Crossroads<sup>SM</sup>, Syniverse's secure Web infrastructure.

- Provides a single point of contact for exchange of roamer billing records.
- Calculates financial net position with roaming partners.
- Enables revenue assurance by ensuring valid messages.
- Allows unlimited number of concurrent users.
- Uses templates and ad hoc queries to transform data into useable information.
- Maximizes data filtering by isolating business segments so you can focus on key performance trends and patterns.

### **A Powerful Information Management Tool**

With this innovative system, you are able to get basic and customized reports and benefit from advanced scheduling and grouping capabilities. ACCESSibility allows you to view, print and download Syniverse clearing and settlement reports into third party software such as spreadsheets and other applications. This flexibility gives you financial and analytical settlement information quickly and easily.

### **Benefits of ACCESSibility**

- Allows unlimited number of concurrent users
- Uses templates and ad hoc queries to transform data into useable information
- Maximizes data filtering by isolating business segments so you can focus on key performance trends and patterns
- Provides flexible reporting such as charts and graphs to quickly show critical information
- Enables you to use your valuable data privately and securely on your desktop
- Provides market analysis information about roaming behaviors
- Creates financial reports
- Enables report scheduling for maximum efficiency

### **Business Intelligence**

Using Analyzer and Decision Support, Syniverse offers customers the foundation to achieve key business goals by providing a way to capture, optimize and evaluate data while enhancing the decision-making processes.

Syniverse's **Analyzer** can give you the enhanced functionality you need to make intelligent decisions. With Analyzer, you have the ability to build your own reports using several customizable functions including filtering, formatting, formulas, subtotals and grand totals. You'll also get the flexibility to view reports in a multitude of formats including charts, tables, ticket tape or narratives.

Analyzer allows you to take control of the system by customizing what works best for you. In addition to performing ad hoc queries using predefined financial and analytical subject areas, Analyzer can give you a snapshot of your business performance today and compares your performances based on the variables you want. This allows you to dig deeper into your data to identify key performance indicators. A user can view multiple performance indicators from numerous subject areas to review different business perspectives on one screen. Analyzer also lets you customize your desktop by incorporating a familiar corporate look with your own logos and corporate links.

## **Syniverse Technologies**

Serving more than 800 communications companies in over 160 countries, Syniverse Technologies (NYSE:SVR) offers market-leading solutions that simplify the complexities of roaming, messaging, network interoperability and business intelligence for mobile operators, MSOs, enterprise verticals and emerging mobile providers.

In addition to the above functionality, Analyzer offers multi-level functionality so you can:

- Create Call Detail Reporting (CDR) at the MIN level
- Retrieve data from a Syniverse data warehouse
- Upload multiple MIN and/or SID list for focused analysis
- Identify geographic overlaps between non-preferred roaming markets
- Quantify overlap variance from non-preferred roaming activity

### **Crossroads**

Syniverse's Web-based products and services are literally at your fingertips with Crossroads, the industry's premiere online enterprise. Crossroads is a unique Syniverse service used with a secure Web infrastructure to give you access to Syniverse's Web-based products and services in a flexible and highly functional environment. Syniverse simplifies the way you do business by integrating its ACCESSibility, Prepaid Wireless, STREAMLINER®, Visibility® Services and Wholesale Rating Engine services.

### **Superior Customer Support**
