Online reporting	Customized reporting with Analyzer, Syniverse’s dynamic reporting tool that enables you to produce reports on demand or via time-based scheduling, in real time and in multiple export formats

Syniverse Technologies

Serving more than 800 communications companies in over 160 countries, Syniverse Technologies (NYSE:SVR) offers market-leading solutions that simplify the complexities of roaming, messaging, network interoperability and business intelligence for mobile operators, MSOs, enterprise verticals and emerging mobile providers.

- Near real-time business-process monitoring and automated transaction processing for invoice handling, payable invoice reconciliation and cash allocation.
- Guidance, support and management of roaming agreements annexes associated with financial settlement
- Complies with the GSM Association rules and regulations for invoicing and settlement
- Clears GSM voice traffic, messaging (SMS and MMS, including interworking) and data (3G, GPRS and WLAN) transactions
- Process transparency and transaction efficiency
 - Sophisticated document handling solution automatically extracts and stores client roaming invoices, payment notification and credit/debit note data, then passes data on for further processing.
 - Allows client viewing of scanned document images via Syniverse online portal.
- Proactive management, alerting and reporting on transactions, cash management, and appropriate controls on payment release process
- Optimal operational flow – users have a consistent system-led approach to financial clearing transaction processing

IOT Discount Management System (DMS)

Our optional DMS tool effectively manages IOT discounting between mobile operators, simplifying the increasingly complex IOT discount schemes found in the roaming marketplace. DMS removes problems and costs of internal billing development and allows international roaming managers to negotiate innovative discounting schemes. DMS also:

- Handles complex deals at the mobile group and inter-alliance levels as well as bilateral agreements.
- Cuts costs by outsourcing resource- and time-intensive internal management.
- Manages IOT discount late payments and debt collection.
- Adheres to agreed settlement frequency with a minimal risk of delay.
- Lets you apply discounts at invoice level or by credit note, while also enabling you to apply price eligibility criteria.
